CASE FILE: OPERATION OVERDRIVE

Classification: Restricted | Dataset: mtcars

THE INTELLIGENCE

A ghost vehicle was procured off the books — a high-performance asset used to move sensitive cargo between locations. Somewhere in the mtcars fleet, it's hiding in plain sight.

Your code is the horsepower of this vehicle. Find it.

INTERCEPTED FIELD NOTES

Our informant left behind only fragmented notes before going dark. Read carefully — every detail is a clue:

> "Eight chambers of controlled combustion. Nothing less will do."

> "She drinks like she doesn't care about tomorrow — single digits per gallon territory, barely scraping past fifteen."

> "The driver insisted on full control. No automatics. Ever."

> "Heavy. Heavier than you'd think. Well past a ton and three-quarters."

> "Blink and you've missed the quarter mile. Fourteen seconds of pure violence."

YOUR OBJECTIVE

One vehicle in the fleet matches every note. Its horsepower is your code.

Good luck, Detective.
