CASE FILE: OPERATION IRONCLAD — The Ghost Asset

Classification: Restricted | Dataset: house_data1000.csv

THE INTELLIGENCE

One property in the ledger was fabricated — a ghost asset used to park illicit funds. It was designed to blend in, but whoever created it left behind a very specific fingerprint. When all the clues align, only one property remains.

The last two digits of its house number are your code.

INTERCEPTED FIELD NOTES

» "A family home. Three bedrooms. Two bathrooms. Nothing unusual on the surface."

» "Built sometime in the nineties. They liked properties from that era."

» "The valuation was kept modest. Nothing below two hundred thousand, nothing above three."

» "No basement. They needed properties that were easy to inspect — nothing underground."

» "The view rating was logged as two. Not the best, not the worst. Intentionally average."

YOUR OBJECTIVE

Cross-reference every clue. Only one property in the dataset satisfies all of them.

The last two digits of its house_number are your code.

Good luck, Detective.
